EDUCATION

Vishwakarma Institute of Technology, Pune —
Bachelor of Technology in Computer Science & Engineering
Cumulative GPA: **8.80/10.0**

Pune, Maharashtra, India
June 2024 - June 2028

ADDITIONAL INFORMATION

Technical Skills:

HTML5, CSS3, C++, Solidity, JavaScript (ES6+), TypeScript, React.js, Next.js, React Native, Tailwind CSS, Node.js, Express.js, GraphQL, REST APIs, MongoDB, Prisma ORM, Redis, Socket.IO, WebRTC, Docker, Kubernetes (K8s), Git, GitHub, Postman, EC2, Web3, Etherjs, Hardhat,

Certifications & Training

- **Postman API Fundamentals Student Expert** – Postman (2025)
Demonstrated proficiency in *API concepts, HTTP methods, request/response handling, environment variables, and API testing* using Postman.
- **Full Stack Web Development** – Udemy
Completed training in *HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, and RESTful API development*.
- **Docker and Kubernetes for beginners** – Udemy
Hands-on experience with *Docker, Docker Compose, Kubernetes (pods, nodes, deployments, ConfigMaps, Secrets, PV/PVC), implementing API integrations and HPA-based scaling on Amazon EKS*.

PROJECTS

[Healthshield](#) – A Vaccination Tracker

MERN Stack | ZegoCloud | Leaflet.js | Tailwind CSS | Javasripts | Razorpay

- Built a *full-stack vaccination platform* with separate login panels for *Doctors and Parents*.
- Enabled *vaccination slot booking and video consultations* using ZegoCloud.
- Implemented *doctor workflow management and secure hospital verification* with *role-based access control (RBAC)*
- Implemented *search for nearby vaccination centers* using Leaflet.js with *location-based mapping*.

[VIT-Academic](#) – Student Resource Platform

MERN Stack | Tailwind CSS | Javascripts

- Developed a *MERN-based academic platform* for VIT Pune students to access *lecture videos, notes, PYQs, and subject-wise library book recommendations*.
- Curated *topic-wise technical learning resources* by integrating **YouTube educational content**, supporting *50+ daily active first-year students*.

[Twitter Clone](#) – Social Media Platform

Next.js | React-Query(Tanstack) | Node.js | Express.js | PostgreSQL | Prisma | GraphQL | Socket.IO | Redis | Kafka

- Built a *full-stack Twitter clone* with features like *Google OAuth, follow/unfollow, posting tweets, and real-time community messaging* using Socket.IO.
- Implemented *GraphQL APIs* with *Prisma ORM* for *PostgreSQL database operations*.
- Integrated *Kafka* for *producer-consumer messaging*, enabling **real-time notifications, message streaming, and scalable communication**.
- Used *Redis* for *caching and improving performance* in *high-traffic real-time interactions*

EXTRACURRICULAR ACTIVITIES

- Participated in *More than 3 hackathons*, collaborating with teams to build *innovative solutions* and gain *real- world problem-solving experience*.
- Web Development Coordinator – CSA Club, VIT Pune: *managed web projects, team coordination, and junior mentoring*.
